

About us....

Started in 2018, we specialize in the import and export of high-quality engineering products, serving as a reliable partner for businesses seeking advanced solutions across various industries. With a focus on precision, innovation, and customer satisfaction, we bring world-class engineering products to global markets while also representing leading manufacturers who trust us to expand their reach.

Our expertise spans a wide range of engineering sectors, including but not limited to:

- Machinery & Equipment:** Supplying industrial machinery designed to meet the toughest demands, ensuring efficiency and performance.
- Electrical Components:** Offering electrical solutions that adhere to the highest safety and operational standards.
- Mechanical Parts & Tools:** Delivering high-quality mechanical parts and tools essential for the success of any engineering project.

As a trusted representative, we not only import products to meet local demand but also create opportunities for manufacturers to export their products globally, helping them penetrate new markets and increase visibility. Our team is committed to building long-lasting partnerships based on transparency, reliability, and excellence in service.

At Mega-Tech Express, we bridge the gap between global manufacturers and local markets, providing the engineering solutions you need to excel in a competitive world.

Brushless slipring from USA

One Conductor

Two Conductors

Three Conductors

Four Conductors

Six+ Conductors

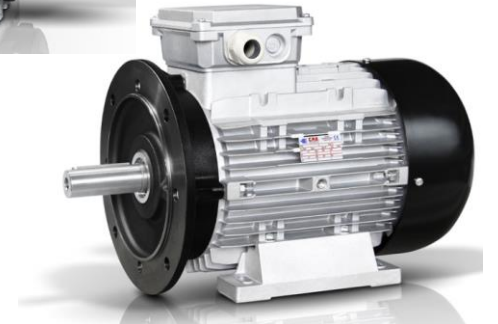

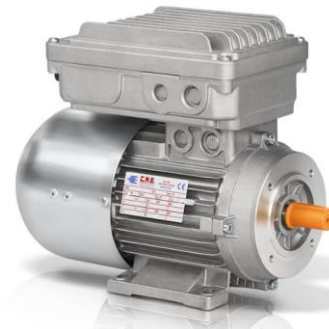

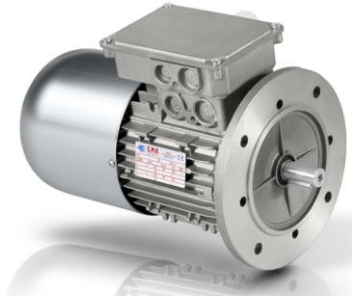

Application:

- Bearing protection
- Cable reels
- Cranes
- Electroplating
- Heated rollers
- Leslie speaker
- Lighted wind sock
- Medical research
- Packaging machinery
- Remote video inspection
- Robotics
- Rotary motion control systems
- Semiconductor
- Spinning lights
- Thermocouple Temperature Sensing
- Turntables
- Ultrasonic fabric cutting
- Vehicle-mounted camera
- Welding
- Wind turbines

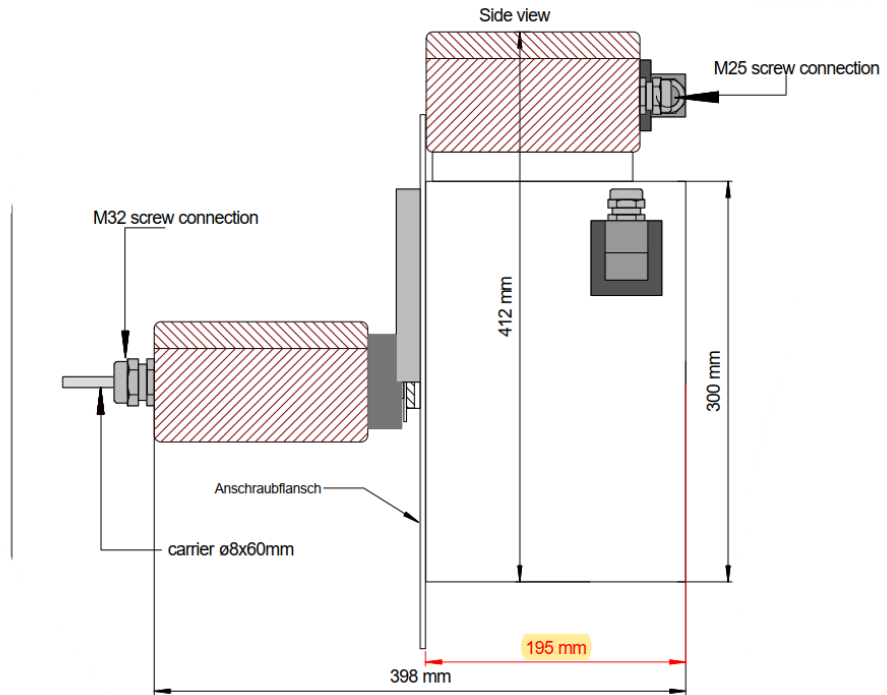

Motors from Italy:

- **Three-phase Motors**
- **Single-Phase Motors**
- **Double polarity motors**
- **Motors with low Overall Dimension serie "R"**
- **Brake Motors**
- **Extruded Motors Serie "E"**
- **Inverter Electric Motors**
- **High Efficiency Motors IE2/IE3**

Lichtleitertechnik Falkenhain

Fiber optic technology from Germany for port cranes

series of our rotary joints

Type B(KF) for 6 to 12 glass fibers
Type B(KF) for 13 to 36 glass fibers
Type B(GF2) for 6 to 12 glass fibers
Type B(GF2) for 13 to 36 glass fibers
Type B(GF3) for 6 to 12 glass fibers
Type B(GF3) for 13 to 36 glass fibers

brevetti stendalto DYNAMIC CABLE PROTECTION

PRODUCTS

Nylon cable chains

A wide range of cable chains to meet any requirement for dynamic protection of cables and hoses.

Steel cable chains

Our steel cable chains are available in various sizes, and manufactured in high-resistance zinc-plated or stainless steel.

Cable chains for robotics

Six robot chain models designed for dynamic protection of cables and hoses in a rotational application.

Extra-flexible cables

Brevetti Stendalto's extra-flexible cables are studied and produced with the highest technology, in order to guarantee the best electrical and mechanical performance.

Sheaths and connectors

Brevetti Stendalto completes the range of its specific products for dynamic cable protection with Reiku flexible polyamide sheaths

Total chain

A plug and play system where the chain, pre-assembled with cables and connectors, is delivered on site ready to be installed.
